- Dolby Atmos 24 bit 48 kHz

“What is astonishing is their musical concordance, the perfect agogics, a flawless performance, a meaningful tonal language. With the Onyx Piano Duo, the music seems to come from a creative source.” – *Mainpost*

From New York via Amsterdam to Paris and Vienna – on their debut album, the *Onyx Piano Duo* combines well-known piano works for four hands with exciting discoveries: the journey begins with *Samuel Barber's Souvenirs Op. 28*, followed by *Leo Smit's Divertimento* and finally leads via *Maurice Ravel's Ma mère l'Oye* to *W. A. Mozart's Sonata in C major K521*. The two pianists' captivating joy of playing makes these interpretations a very special experience!

The *Onyx Piano Duo* is praised by the press for its subtle sense of timbre, technically crystal-clear refinement and the unconditional fusion of the two musicians at their instrument. Whether at two pianos or four-handed at one instrument – their interpretations always focus on the joint understanding of the music. The desire to discover, the curiosity and the endless joy of making music together are characteristic of the young duo. Together both pianists studied with Bernd Glemser and Denise Benda in Würzburg and refined their skills with other important musicians such as Eberhard Feltz and Reto Bieri.

Immersive Sound Art is aiming to present outstanding independent Artists in the entirely new experience of immersive audio formats. Additional spatial information make a more natural reproduction of instrument timbres possible and lead to an acoustic envelopment that involves the listener more emotionally into the musical performance. The reference quality product is manufactured in a sustainable process on demand and therefore issued in a hand selected numbered edition to the customer.
